

Patrick Bradley Limited

ENVIRONMENTAL POLICY STATEMENT

Patrick Bradley Ltd recognises the importance of the need to preserve the environment and thereby incorporate environmental management within all aspects of its work activities

The company operates a quarry, which manufactures and supplies aggregate and aggregate based products, and undertakes Civil Engineering, Road works and Building Works.

This Policy has been developed to ensure that the activities of Patrick Bradley Ltd are carried out with minimal environmental impact, thus achieving the aims of sustainable development.

In our commitment to the prevention of pollution, we have a documented environmental management system that ensures we: -

- Design, specify and operate our activities to the highest standards according to the principles of BATNEEC (best available techniques not entailing excessive cost) and BPEO (best practical environmental option).
- Comply with the requirements of ISO 14001:2015 approved Environmental System.
- Encourage effective resource management; encompassing the reduction of resource consumption, waste minimisation, and recycling and environmentally benign disposal.
- Comply with all relevant environmental legislation, regulations and codes of practice and to keep abreast of all changes in legislation.
- Provide ongoing environmental training to all staff (and sub-contractors) to increase awareness of the potential environmental effects of their activities and the benefits of improved environmental performance.
- Develop effective procedures for response to incident or emergency situations, thereby avoiding or minimising environmental damage.
- Promote and encourage the pursuit of increased environmental performance, not only within the company itself, but also throughout our suppliers and Clients.

The company is committed to continual environmental improvement which will be achieved through setting environmental objectives and targets on an annual basis. These objectives and targets are documented in the integrated management system.
